

Modify Elements from a List with Streams

Usecase: Moving Directory structures. Example: copy files with directories to different Root Path

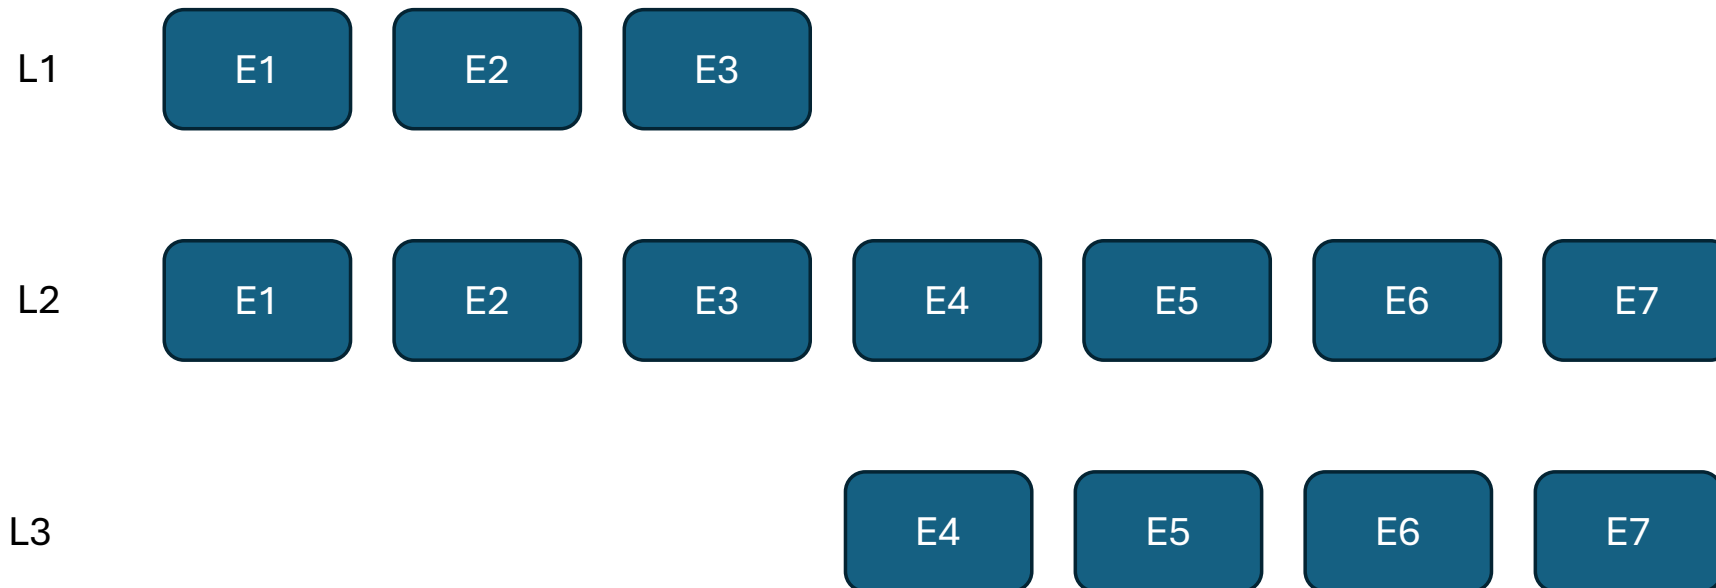

Source: C:\Windows\System32\Boot\en-US

Dest: C:\Whatewer Directory\Boot\en-US

Solution in two step:

- 1.) **remove** C:\Windows\System32 so the result is then: Boot\en-US
- 2.) **add** a new Root Dir C:\save\Whatewer Directory\ **to** Boot\en-US

Removing Root Path with some Directorys

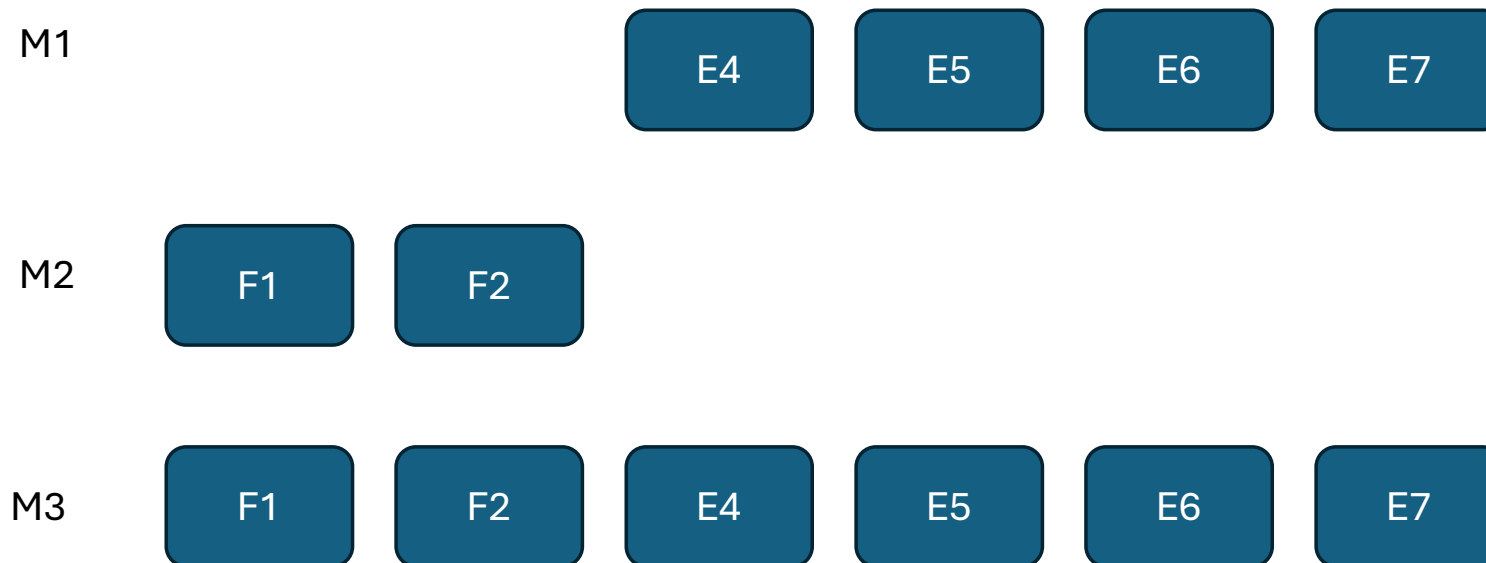

1.) **remove** C:\Windows\System32 so the result is then Boot\en-US

L1: C:\Windows\System32

L2: C:\Windows\System32\Boot\en-US

L3: Boot\en-US

Add new Root Path with some Directorys

2.) **add** a new Root Dir C:\save\Whatewer Directory\ **to** Boot\en-US

M1: Boot\en-US

M2: C:\save\Whatewer Directory

M3: C:\save\Whatewer Directory\Boot\en-US
